

HighWire Strengthens Publication Management Team

Palo Alto, CA – July 11, 2011

Continuing on Stanford University's investment plan, HighWire Press is proud to welcome two high profile members to its Publication Management team: Judith Barnsby, based in the UK, and Bert Carelli, at its headquarters in California.

“One of HighWire's most impressive strengths is our industry leading high-touch service,” said Managing Director, Tom Rump. “Our personalized account management approach is to engage closely with our community, and to act as an extension of our customers' staff. These two highly qualified individuals will be of great benefit both to the organization and our clients.”

Judith Barnsby comes to HighWire with more than 20 years of experience in electronic publishing. Working for society publishers, Judith managed the relationships with a broad range of publishers. As head of e-Development at IOP Publishing, she was responsible for product management of their journal delivery platform and peer review/production system. Judith is currently chair of the UK's JISC PALS group of publishers and librarians working together to solve interoperability issues, and has also been involved in CrossRef, CLOCKSS, TRANSFER, and PEER among other industry initiatives.

Bert Carelli is also a veteran of the online information industry, most recently with Access Innovations, a semantics enrichment and information management company. His previous work included leading content acquisition teams for DeepDyve, Dow Jones/Factiva and Dialog, and creating partnerships between content providers and technology companies. “As a previous HighWire customer and vendor, I've always felt that the service provided to publishers is first-class,” said Mr. Carelli. “It's a pleasure to have the opportunity to work from the inside.”

“We are very pleased to add Bert and Judith to our growing team of skilled publication and technology management professionals,” said Mark Johnson, HighWire's Associate Director of the Publication Management Team. “Both come to us with deep experience and understanding of our industry and will provide a level of strategic thinking that will continue to help our publisher clients thrive.”

HighWire is currently seeking applicants both for senior account management positions as well as technical ‘on the ground’ publication team specialists. Search for “HighWire” at <http://jobs.stanford.edu> for detailed job descriptions.

About HighWire Press

At the forefront of strategic scholarly publishing, HighWire Press provides digital content development and hosting solutions to the scholarly publishing community. A division of the Stanford University Libraries, HighWire has partnered with influential societies, university presses, and other publishers since 1995 to produce the definitive online versions of high-impact, peer-reviewed journals, books, reference works, and other scholarly content. The distinguished

HighWire community shares ideas and innovations in publishing through regular meetings, an active discussion forum, and through the service of its highly qualified staff.

The underlying infrastructure of HighWire's electronic publishing platform is Web-services-oriented, flexible, and permeable, designed to allow publishers to easily layer new software and services to their sites and meet the ever-changing needs of today's online and mobile readers.
